Hand Surgery

A field where we can offer you much more than just standard treatment solutions for, say, distal radius fractures. Many of our products are intended to help you to achieve outstanding results in difficult, non-everyday situations as well. Products such as our Ulna Head Prosthesis (UHP) or the Flower Plate for mediocarpal partial arthrodesis are excellent examples.

Our objective is to simplify hand surgery interventions via intelligent system solutions, helping you to achieve the best possible results in the interest of the patient. Working in close cooperation with well-known authors and their teams, we have translated new ideas into innovative products that are consistently being developed further in an ongoing process. The result is a wide range of high-quality systems that impress with their clever design along with easy and safe handling.

Furthermore we have never lost sight on the economic perspective and service needs of our customers.

We consider ourselves as a true partner – to be relied upon for routine tasks and special challenges alike.

Linus
for hand fracture treatment

HBS 2
for the treatment of fractures and non-unions in small bones

Canos
cannulated screws for the treatment of small bone fractures

Ixos®
for the treatment of distal radius fractures

CapFlex PIP
for endoprosthetic treatment of the PIP joints
