78532 Tuttlingen  
Germany

**Individual Patient Solutions**

One Patient. One Solution.

**Berlin Masterclass  
on New Digital Technologies  
in CMF Surgery**

**17 - 19 October 2026**

in cooperation with

Charité Universitätsmedizin Berlin

Course is pending for credit points

**Course concept**

The Berlin Masterclass course offers an exclusive opportunity to learn the theoretical and practical clinical applications of state-of-the-art digital and custom-made solutions for all sub-disciplines of CMF surgery.

The event's small group learning environment provides ideal conditions for hands-on training and surgical guidance. Attendance is therefore limited to a maximum of eight participants.

The course is aimed at CMF surgeons who wish to deepen their knowledge of the use of digital technologies and custom-made solutions or who would like to prepare the introduction of these technologies in their departments.

**Course chairman**

**Max Heiland**

**Faculty**

**Kilian Kreutzer**

**Christian Doll**

**Simon Bigus**
