Berlin Masterclass on New Digital Technologies in CMF Surgery

**27 - 29 April 2024 or
19 - 21 October 2024**

in cooperation with
Charité Universitätsmedizin Berlin

Courses pending for Credit Points

Program

Course concept

The Berlin Masterclass course offers an exclusive opportunity to learn the theoretical and practical clinical applications of state-of-the-art digital and custom-made solutions for all sub-disciplines of CMF surgery.

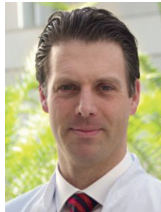

The event's small group learning environment provides ideal conditions for hands-on training and surgical guidance. Attendance is therefore limited to a maximum of eight participants.

The course is aimed at CMF surgeons who wish to deepen their knowledge of the use of digital technologies and custom-made solutions or who would like to prepare the introduction of these technologies in their departments.

Faculty

Max Heiland
Course Chairman

Kilian Kreutzer
